

Brilliant for Coating

BascoPrime 2-component filler, colourless 53-0007-340

Property	Advantage
- Absolutely transparent	- Does not falsify the carbon look, not even at long distance
- Excellent adherence	- Lacquer does not split after impact, GT0 on epoxy resin
- No pinholes	- Saves times as well as material, suitable for ultra light constructions.
- High solid matter content	- 3D effect of carbon is intensified
- Thixotropic primer	- High wet film thickness in one spray operation (up to 100µm)
- Easy abrasability	- Time saving - Abrasive saving
- In spite of fast drying, long pot life	- Fast proceeding - Less material wear - Rationalised work
- Low working pressure	- Less material wear - Less overspray - Easier handling

For details with regard to the starter kit, reference is made to our web page www.finres-sa.com or to the enclosed order form.

Brilliant for Coating

BascoClear 2-component clear coat, glossy 54-0111-341

Property	Advantage
- Tested in accordance with VDA	
• Temperature resistant	• No loss of coat property
• Chemical resistance	• Protects carbon against motor oil, brake fluid, petrol, diesel, etc. in accordance with VDA 621-412
• Condensation water test / weatherproof	• No quality loss even during long time extreme weathering
• UV resistant	• Up to 1000 hours in accordance with VDA
• Hardness adjusted to composite substrate	• Scratch resistant, impact resistant thanks to flexibility
- Direct adhesion on carbon	- No primer required = work is rationalised
- Absolutely brilliant and transparent	- Very beautiful gloss, enhances 3D effect on carbon - Natural carbon look - Carbon structure still noticeable on long distance
